
Unidirectional Flushing Program

Day 1 Complete

With the first day of flushing complete (Zone 0 and Zone 1), Public Works would like to thank you all for your patience and understanding as we continue to move forward with this process.

This type of aggressive flushing is a first for the District, and unfortunately we are not able to pin point exactly where, when or how it will affect other areas of town while we flush each zone.

Again, we wish to you remind everyone that while your street is being flushed please do not use your water or flush your toilet.

Once your street is complete, we advise to fully open cold water taps outside your home for 15 minutes until it clears.

Ultimately, this aggressive flushing will remove long term buildup in the water system, help improve water quality and restore capacity.

Day 2 – Thursday April 20, 2017: Zone 2, will begin at 8:30 am

If you have any questions or concerns, please call Warren Cannon at 250-726-5507, Steven Lang at 250-266-0598 or Public Works at 250-726-8587.
