WELCOME JAYDA KONNILA

Hello Ucluelet! My name is Jayda (she/her), and I'm this season's Swim Instructor. I've always had a love for the water, whether it was the ocean or the pool. Growing up, I participated in multiple water sports, including competitive swimming and rowing, which eventually led me to become a certified Lifeguard and Swim Instructor in 2018. As an instructor, my goal is to meet swimmers where they are and help them build confidence in the water. Through a mix of play and practice, I strive to create a fun and supportive environment where swimmers can reach goals at their own pace!

HAVE YOU EVER HEARD OF THE FELDENKRAIS METHOD?

The Feldenkrais Method is a somatic education technique that uses gentle movement and directed attention to help people learn new, more efficient, and less stressful ways of moving, improving body awareness and overall function. This method focuses on learning through the body, rather than just the mind, emphasizing the connection between thoughts, emotions, and physical movement.

The Feldenkrais Method is based on principles of physics, biomechanics, and an empirical understanding of learning and human development. Moshe Feldenkrais said, “We move according to our perceived self-image.” By expanding your perception and increasing awareness, you will become more aware of your habits and tensions and develop new ways of moving. By increasing sensitivity, the Feldenkrais Method assists you to live your life more fully, efficiently, and comfortably.

You can increase your ease and range of motion, improve your flexibility and coordination, and rediscover your innate capacity for graceful, efficient movement. Since how you move is how you move through life, these improvements will often enhance your thinking, emotional regulation, and problem-solving capabilities.

AWARENESS THROUGH MOVEMENT©

Join Jeffery Wilson, a guild certified Feldenkrais teacher!

Different than yoga, Pilates, and all kinds of valuable exercise training, Feldenkrais Awareness Through Movement© is less about movement than it is about the awareness of how we move. Imagine walking or sitting, rising from bed or a chair more easily, bending down to feed a pet or greet a young child more gently, or doing a more relaxed crawl stroke at the swimming pool.

Awareness Through Movement involves guided movement sequences in a group setting, encouraging participants to explore different movement options and become more aware of their body’s sensations.

The Feldenkrais Method is a powerful tool for improving movement, reducing pain, and enhancing overall well-being by fostering greater body awareness and promoting efficient, adaptable movement patterns.

Jeffery Wilson leads weekly Awareness Through Movement© sessions on Saltspring Island, in Chemainus and in Victoria, at community centres and at community-minded low costs. For more information contact Jeffery, jefferywilson660@gmail.com or phone: 250 - 732 - 8894.

Did you know the game was created in 1965 on Bainbridge Island, Washington, at the summer home of Joel Pritchard. According to Joan Pritchard, Joel Pritchard’s wife, “The name of the game became Pickle Ball after I said it reminded me of the pickle boat in crew where oarsmen were chosen from the leftovers of other boats. Similarly, the game of pickleball was created from leftover equipment from several sports; a badminton court, paddleball paddles, a wiffle ball and a net height like that of tennis.
