Subject: Amendment RZ25-06

[External]

Dear mayor and council,

I am writing to you today to voice my strong opposition to the proposed bylaw amendment RZ25-06 affecting 604 rainforest drive.

To at this point suggest to turn this project's ground level into short term housing is nothing short of scandalous. When the developer originally presented his project, he promised to provide an affordable location to accommodate the future medical clinic. Somehow the council approved the project, even though a loud majority of neighbours voiced their concerns regarding the proposed project. Shortly after, the developer proceeded to cut every single tree on his property, not respecting at all his proposed development plan. Fast forward to today, after having had us endure his concrete fiasco for a few years, he now wants to turn the ground floor into short term rental units, which would benefit only himself.

I wonder if the developer proposed the current amendment when he originally proposed the medical clinic would there be a chance that this project be approved? Obviously not. So my question is, why are we considering allowing it today?

Mayor and council, thank you for the opportunity to be heard today. I sincerely hope that you will take into consideration what the families of this tranquil neighbourhood have to say regarding this matter. Thank you for your time,

Arnaud Dagenais
