**[External]**

Regarding the eyesore on rainforest drive and rezoning application.

The last thing the community needs is short-term medication rentals in this location.

The first thing that should occur is remediation of the 6-meter green space on the perimeter of the property , as well as remediation of rent and Denise's property green space which blew down as a result of excessive clearing at 604 Rainforest drive.

The maximum footprint for a building on the lot should be returned to its original intention as the applicant failed in his original attempt to make a doctor's clinic.

If the applicant doesn't have a good plan he should sell the property. He has been given a good offer to sell the property to someone who can afford to develop it without putting in a bunch of short-term vacation rentals. The short-term vacation rental market is completely saturated to the point where there are virtually no off-season rentals.

Cheers Rich Ronyecz.

Rainforest lane.
