Subject: Hypocus development

[External]

My name is Mathew and I am for this development. I understand the worry of the people opposed to this development, but to me the town has already changed so much, that old Ucluelet is already long gone and as a small trades business, we need this type of project for our business. I am not the best with words but I think these developments are needed not only for the people who need homes but also for all the local trades

Thanks for your time.
